

## BROWSER TAB

The top section within the browser is fully controlled and fully customizable by ThinKiosk profile editor.

If you'd like to change any settings, please go into your profile editor and then in the "Secure Browser".

Selecting or deselecting the option below will hide / show the option at the Thin Client point.

You can create a list of URLs available in the ThinKiosk client by using the Web Sites list as show below.

The screenshot shows the ThinKiosk Profile Editor interface. The left sidebar contains a tree view of configuration categories, with 'Web Sites' under 'Secure Browser' selected. The main area shows the 'Web Sites' configuration page with a table of browser sites.

Website Label	Website URL	Scroll Bars Enabled	Trusted
Storefront	http://yourCitrixWebStorefront	True	True
ThinScale	https://www.thinscale.com/	True	True
Microsoft	https://www.microsoft.com/en-us/	True	True
