THINSCALE CLOUD

The ThinScale Cloud

Access secure device management from anywhere

Discover the advantages

Secure Management

With the ThinScale Cloud, you can centrally control and monitor all your devices from a dashboard, reducing IT workload and enhancing productivity.

Scalability

The ThinScale Cloud scales effortlessly to meet your needs. Add or remove devices as your organization grows without the hassle of hardware limitations or downtime.

Enhanced Security

Protect your endpoint deployments and data with additional security features. Benefit from real-time analytics, automatic updates, and robust access controls to safeguard your organization against evolving cyber threats.

Anytime, anywhere access

Access the ThinScale Device Portal from anywhere, at any time. Enable remote troubleshooting and fast support for your team, ensuring uninterrupted operations.

Cost-Efficiency

Reduce capital expenditures on hardware and maintenance. The ThinScale Cloud offers a simple subscription model, eliminating the need to host your database and the associated hardware costs.

Compliance Made Easy

Stay compliant with industry regulations. ThinScale helps you maintain data privacy and compliance standards on your endpoints and maintain these settings securely in the ThinScale Cloud.

Rapid Deployment

Get up and running quickly with minimal setup time. With the ThinScale Device Portal, you can deploy new policies and updates across your endpoints with just a few clicks.
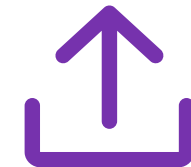

Proactive Monitoring

Identify and resolve issues before they impact your business. Monitor the health and performance of your endpoints in real time.

What can you expect from the ThinScale Cloud?

Role-based administration

Specify permissions to people, teams, or departments within the organization for quick delegation

Software Package Creation & Deployment

Create and deploy software packages centrally, directly to user endpoints
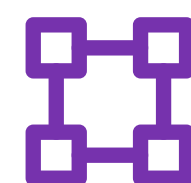

Multi-Tenancy

Complete multi-customer control with the ThinScale Device Portal's in-depth roles and permissions

Simplified management and support

Simplify your work. Easily control and monitor your entire estate from any location and automate tedious administrative tasks

Scalable architecture

Easily increase or decrease the devices in your environment using our simplified UI, with transferable licensing easily being assigned to new machines in a few clicks

Cloud-based

The ThinScale Device Portal is easily accessible at any point with the correct credentials via HTML
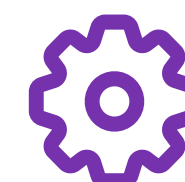

Secure admin credentials

Full support of authentication providers and MFA ensures administrative credentials are protected

Policy and profile-driven

IT administrators can centrally configure profiles defining how Secure Remote Worker and ThinKiosk behave

Central management

Manage your entire deployment of Secure Remote Worker and ThinKiosk devices centrally
